

SRI-ENACT

Co-creating Tools and Services
for Smart Readiness Indicator Uptake

SRI-ENACT aims to **engage stakeholders** in national and EU level to co-create tools and services for the Smart Readiness Indicator (SRI) uptake. The project will develop **tools and services that calculate the SRI** and provide recommendations and guidance for buildings smartness upgrades.

SRI-ENACT tools and solutions will be evaluated in large-scale pilots across EU, targeting **1.200 SRI assessments**. The SRI Assessment Programmes (1 per pilot country) will be implemented in three engagement cycles ('Testing', 'Scale up' and 'Replication' cycles). The consortium partners will offer **training packages to potential SRI auditors** (building a network of 120 SRI auditors).

SRI-ENACT

Co-creating Tools and Services
for Smart Readiness Indicator Uptake

The key objectives of the SRI-ENACT project are:

STAKEHOLDER ENGAGEMENT

SRI-ENACT engages stakeholders at the national and EU levels in a co-creation process for the design of the SRI-ENACT approach

TOOLKIT

SRI-ENACT develops a web-based toolkit implementing the proposed SRI-driven methodology

PILOT ASSESSMENT

SRI-ENACT trains 120 auditors who will assess 1,200 buildings across 8 EU Pilot Countries

FINANCING SCHEMES

SRI-ENACT explores and develops concepts for the financing of building smartness upgrades
